01 Course Overview

The AI landscape is expanding faster than most professionals can track. This course cuts through the noise — teaching students not just *how* to use AI tools, but *which* tool to reach for in every professional and personal scenario.

What This Course Is	A practical, tool-first curriculum covering 40+ AI tools across 11 categories, structured around real tasks, real workflows, and real outcomes.
Why It Matters	AI fluency is now a baseline professional skill. Knowing which tool solves which problem separates high-performers from the rest. This course builds that instinct.
Who It Is For	Non-technical to semi-technical learners: marketers, writers, analysts, developers, freelancers, students, and anyone looking to multiply their output with AI.
Teaching Method	Every week combines concept explanation, live tool demos, hands-on assignments, and a real-world use case to anchor learning in practice.

02 Learning Objectives

01	Tool Selection Mastery Identify the best AI tool for any task within seconds using a structured decision framework.
02	Prompt Engineering Write precise, effective prompts that consistently produce professional-quality outputs.
03	Workflow Automation Build automated pipelines using AI agents that reduce manual, repetitive work.
04	Content Production Generate written content, images, videos, and audio at professional quality.
05	Research & Analysis Use AI to surface insights from data, papers, and documents faster than ever.
06	Coding Acceleration Use AI coding tools to write, debug, and ship code regardless of experience level.
07	Career Positioning Build a portfolio of AI-powered projects that demonstrate real-world capability.

03 Tools Covered

Category	Tool	One-Line Description	Best Use Case
General AI	ChatGPT (GPT-5.4)	OpenAI's flagship — write, research, analyze, generate images, browse, and code	All-purpose daily AI tasks
	Claude	Anthropic's AI — best for nuanced writing, long documents, and careful reasoning	Writing, analysis, research
	Gemini 3.1 Pro	Google's multimodal AI — strong on images, research, and Workspace integration	Research, visual tasks
	Grok	X's AI — real-time social data access for live fact-checking and news	Real-time information
	Microsoft Copilot	AI built into Word, Excel, PowerPoint, Teams, and Outlook for office work	Microsoft 365 users
	Meta AI	Free AI assistant inside WhatsApp, Instagram, and Facebook	Social / casual AI tasks
	Perplexity	Citation-first AI search engine delivering sourced real-time answers	Fast sourced research
Coding & Development	Cursor 3	AI-native IDE with parallel background agents that write full features	Senior dev productivity
	GitHub Copilot	Inline code completion, chat, and issue-fixing natively inside VS Code	Daily coding
	Replit AI	Build, run, and deploy apps from plain-language prompts in the browser	Rapid prototyping
	Devin	Fully autonomous AI engineer that handles entire tickets end-to-end	Complex dev tasks
	Codeium	Free AI autocomplete across 70+ editors with chat support	Budget-conscious devs
	Google Antigravity	Google's agent-first IDE with multi-agent orchestration and browser testing	Enterprise dev teams
Writing & Content	Jasper	Generate on-brand marketing copy and campaigns at scale	Marketing teams
	Copy.ai	Sales and marketing content — emails, ads, product descriptions	Outbound sales & ads
	Grammarly	Real-time grammar, tone, and clarity improvement for any writing	All professional writers
	Notion AI	AI writing and summarization inside your Notion workspace	Knowledge workers
	Writesonic	SEO-optimized blog and web content with built-in keyword targeting	Content / SEO teams
Image Generation	Midjourney v8	Gold-standard artistic image generation — 2K native resolution	Creative / design work
	DALL-E 3	OpenAI's generator with best comprehension of complex prompts	General image creation

Category	Tool	One-Line Description	Best Use Case
	Stable Diffusion	Open-source image generation — run fully locally for free	<i>Developers, budget users</i>
	Adobe Firefly	Commercially safe AI images trained on licensed Adobe Stock	<i>Commercial / brand assets</i>
	Canva AI	Design platform with built-in AI generation and background removal	<i>Non-designers</i>
Video Generation	Sora	OpenAI's cinematic text-to-video model — high visual fidelity	<i>Filmmaking, social ads</i>
	Runway Gen-3	Creative video generation with fine-grained motion control	<i>Video editors</i>
	Synthesia	Professional avatar-based business videos from a script — no camera needed	<i>Corporate training</i>
	HeyGen	AI avatars with real-time lip-sync translation in 40+ languages	<i>Global video content</i>
Audio & Voice	ElevenLabs	Most realistic TTS and voice cloning — audiobooks, agents, YouTube	<i>Voice content creators</i>
	Descript	Edit podcasts like a doc; overdub replaces words in your own voice	<i>Podcasters</i>
	Whisper (OpenAI)	Open-source speech-to-text with near-human accuracy across languages	<i>Transcription pipelines</i>
Research & Search	Perplexity Pro	AI search with real-time citations — 1B+ monthly queries	<i>Any research task</i>
	NotebookLM	Upload documents and ask questions with grounded sourced answers	<i>Document research</i>
	Elicit	Extract and compare findings from academic papers automatically	<i>Academic research</i>
	Consensus	Find science-backed answers by searching peer-reviewed papers	<i>Evidence-based decisions</i>
Productivity	Notion AI	AI writing and Q&A; inside a fully integrated workspace	<i>Team knowledge management</i>
	Motion	AI project manager that auto-plans your day based on deadlines and priority	<i>Overloaded professionals</i>
	Gamma	Convert rough notes into polished slide decks or docs in seconds	<i>Presentations</i>
	Otter.ai	Live meeting transcription with speaker ID and keyword search	<i>Meetings</i>
AI Agents / Automation	Zapier AI	Automate workflows across 5,000+ apps using natural-language triggers	<i>Business automation</i>
	Make	Visual drag-and-drop workflow automation with AI steps	<i>Power users</i>
	n8n	Self-hosted workflow automation with full code control	<i>Developers / privacy</i>

Category	Tool	One-Line Description	Best Use Case
	AutoGPT	Open-source autonomous agent for goal-driven multi-step task execution	<i>Experimental projects</i>
Design & UI	Figma AI	Design suggestions, auto-layout, and component generation inside Figma	<i>Product designers</i>
	Framer AI	Build and publish a responsive website from a text prompt in minutes	<i>Founders, marketers</i>
	Wix AI	Describe your business and get a complete website generated instantly	<i>SMB owners</i>
Data & Analytics	Julius AI	Upload a CSV and get charts, summaries, and analysis via chat	<i>Non-technical analysts</i>
	Power BI Copilot	Ask natural-language questions of Power BI reports for instant visuals	<i>Business analysts</i>
	Tableau AI	Natural language queries and AI insights inside Tableau dashboards	<i>Data teams</i>

04 12-Week Detailed Syllabus

Wk	Theme	Topic	Concepts	Tools Used	Assignment	Use Case
1	Month 1: Foundations	AI Tools Landscape	What AI tools are · Categories · How models work · Choosing frameworks · Prompt basics	ChatGPT, Claude, Gemini, Perplexity	Map out your personal AI toolkit for your role	A marketer builds their daily AI shortlist
2		Prompting & Thinking with AI	Prompt anatomy · System prompts · Chain-of-thought · Zero-shot vs few-shot · Iteration	ChatGPT, Claude, Gemini	Rewrite 5 of your own prompts using the CRAFT framework	A developer prompts Claude to review an architecture decision
3		Research & Fact-Checking	AI search vs classic search · Citation verification · Summarisation · NotebookLM deep dive	Perplexity Pro, NotebookLM, Elicit, Consensus	Research a topic and produce a sourced one-page brief	An analyst researches a market using only AI tools
4		Writing & Communication	Long-form writing · Tone matching · Email automation · Brand voice · SEO basics	Jasper, Copy.ai, Grammarly, Writesonic, Notion AI	Write a full blog post and three marketing emails using AI	A startup founder writes launch week content in 2 hours
5	Month 2: Creative & Technical	Image Generation	Text-to-image fundamentals · Style prompting · Commercial safety · Editing workflows	Midjourney, DALL-E 3, Adobe Firefly, Canva AI	Create a complete 5-image brand visual kit	A freelancer builds a client presentation deck in one afternoon
6		Video & Audio Creation	Text-to-video · AI avatars · Voice cloning · Podcast editing · Multilingual content	Sora, HeyGen, Synthesia, ElevenLabs, Descript	Produce a 60-second explainer video with AI voiceover	A training team creates a multilingual onboarding video
7		Coding & Development	AI-assisted coding · Prompt-to-app · Code review · Bug fixing · Agent-based dev	Cursor, GitHub Copilot, Replit AI, Lovable, Bolt.new	Build and deploy a working mini-app from a prompt	A non-coder ships a landing page in under 3 hours
8		Productivity & Workflow Systems	AI note-taking · Meeting intelligence · Calendar AI · Slide generation · Daily systems	Notion AI, Motion, Gamma, Otter.ai, Fathom	Design a fully AI-assisted personal productivity system	A consultant automates weekly reporting and scheduling
9	Month 3: Advanced & Applied	Data Analysis with AI	Conversational data analysis · Chart generation · BI querying · No-code ML basics	Julius AI, Power BI Copilot, Tableau AI, DataLab	Analyse a real dataset and produce a visual summary report	A business analyst delivers a board-ready data deck
10		AI Agents & Automation	Autonomous agents · Workflow automation · Multi-step pipelines · Tool orchestration	Zapier AI, Make, n8n, AutoGPT, CrewAI	Build an end-to-end automated workflow for a real task	An ops manager automates lead capture and CRM updates
11		Real-World Case Studies	Cross-tool workflows · Role-specific AI stacks · Speed vs quality trade-offs · Ethics	All tools from weeks 1–10	Reverse-engineer a professional use case using the right tool stack	Teams present AI-powered solutions to real business problems
12		Capstone Final Project	Project design · Multi-tool integration · Presentation · Peer review · Portfolio build	Student's choice — min. 3 tools	Solve a real-world problem using a multi-tool AI workflow	Students present complete AI-powered projects to a panel

05 Assignments & Projects

Weekly Assignments

Wk 1	Build your personal AI toolkit map across 5 categories
Wk 2	Rewrite 5 prompts using the CRAFT framework and compare outputs
Wk 3	Produce a sourced one-page market brief using Perplexity + NotebookLM
Wk 4	Write a full blog post and 3 marketing emails — AI-drafted, human-edited
Wk 5	Create a 5-image brand visual kit using two different image tools
Wk 6	Produce a 60-second narrated explainer video
Wk 7	Build and deploy a working mini-app from a plain-text prompt
Wk 8	Design a fully AI-assisted weekly productivity system
Wk 9	Analyse a dataset and produce a visual summary report
Wk 10	Build an automated multi-step workflow solving a real task
Wk 11	Reverse-engineer a professional use case with a documented tool stack
Wk 12	Capstone Project presentation (see below)

Capstone Final Project

Students select a real-world problem from their own professional or academic context and solve it using a documented multi-tool AI workflow. Minimum 3 tools. Deliverable: a working solution + a 10-slide presentation explaining tool choices, workflow design, outputs, and lessons learned.

- A job seeker builds an AI-powered personal branding and application system
- A small business owner automates their content calendar, social posts, and customer replies
- A developer ships a SaaS micro-product using AI coding + design + launch tools
- An analyst creates an automated weekly business intelligence dashboard

06 Evaluation Criteria

Component	Weight	What Is Assessed
Practical Application (Weekly hands-on tasks)	40%	Quality, creativity, and tool-selection logic in weekly deliverables
Assignments (Written + submitted work)	30%	Accuracy, depth, and demonstrated understanding of each week's tools
Final Capstone Project (Week 12 presentation)	30%	Problem framing, multi-tool integration, output quality, and presentation clarity

07 Career Outcomes

Role / Path	How This Course Helps	Example Outcomes
Digital Marketer	Master AI copy, ad creative, SEO, and campaign tools	2x content output; AI ad creative at a fraction of agency cost
Content Creator	Generate scripts, voiceovers, thumbnails, and videos with AI	Full YouTube video produced in 4 hours instead of 4 days
Data Analyst	Chat with data, build dashboards, and automate reporting	Weekly BI report automated end-to-end with Julius + Power BI
Software Developer	Ship faster with AI coding tools and autonomous agents	Feature delivery 3x faster; junior devs perform at mid-level
Entrepreneur / Founder	Build MVPs, automate ops, and create content without a team	Launch a product with AI as a virtual co-founder
Freelancer	Offer AI-enhanced services at higher rates and faster delivery	New service lines: AI video, AI content, AI automation consulting
Student / Graduate	Stand out with an AI portfolio and future-proof skill set	Portfolio of 12 real projects across every major AI category

08 Bonus — How to Choose the Right AI Tool

The following decision framework is taught in Week 1 and applied throughout the course. It gives students a repeatable 5-question mental model for selecting the correct tool in any situation.

Step	Question to Ask	What It Determines
1 — Task Type	What am I trying to produce? (text / image / video / code / data / automation)	Which category of tool to reach for
2 — Quality Bar	Does this need to be polished and professional, or is a fast draft sufficient?	Whether to use a premium or quick tool
3 — Technical Level	Does this require code, APIs, or integrations?	General AI vs developer-specific tool
4 — Budget	Is there a free tier that meets the need, or is paid output quality required?	Free vs paid tool selection
5 — Speed	Do I need this in 5 minutes or 5 hours?	Automated tool vs manual AI workflow

Quick Reference Cheatsheet

If you need to...	Reach for...
Write anything	Claude or ChatGPT
Search with sources	Perplexity Pro
Generate an image	Midjourney (art) or DALL-E (accuracy)
Create a video from text	Sora or Runway Gen-3
Clone a voice or make a podcast	ElevenLabs + Descript
Build an app without coding	Bolt.new or Lovable
Automate a workflow	Zapier AI or Make
Analyse data via chat	Julius AI or Power BI Copilot
Research academic papers	Elicit or Consensus
Organise your notes and meetings	Notion AI + Otter.ai
Create slides fast	Gamma
